Water Supply Projects Updates

Chief Operations Officer, Mike Murphy, P.E. Corpus Christi Water
May 23, 2023

Corpus Christi Water

- 1,800 miles of water lines
- 80 million gallons per day (MGD) produced on average last fiscal year
- 500,000 people across the Coastal Bend supplied with water
- Superior water system rating by Texas Commission on Environmental Quality

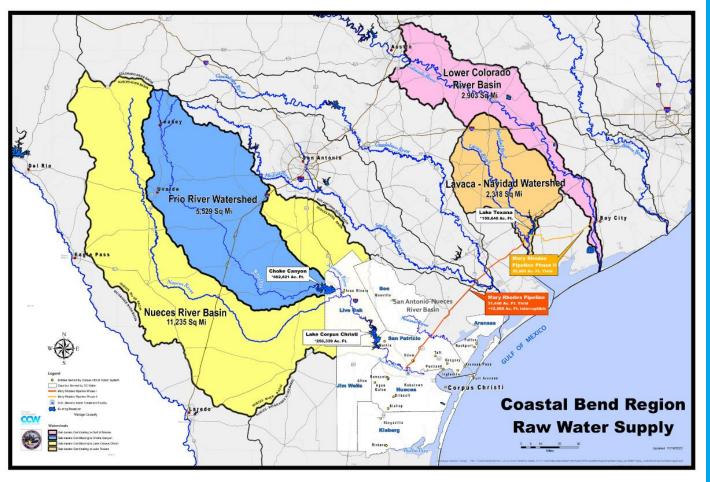

Water Sources

- Lake Texana (Mary Rhodes Pipeline)
- Colorado River (Mary Rhodes Pipeline Phase II)
- Nueces River
 - Choke Canyon Reservoir (CCR)
 - Lake Corpus Christi (LCC)

Conservation 365

Successful spring rain barrel program

 Increased engagement in Xeriscape concepts and 'low-flow' appliances at community events

 Ongoing water conservation educational initiatives are underway

 Fall pipe insulation program to launch in preparation for freezing weather events

Water Supply Improvement Projects

Mary Rhodes Pipeline Phase I

Staff has outlined the 101-mile condition assessment scope of work

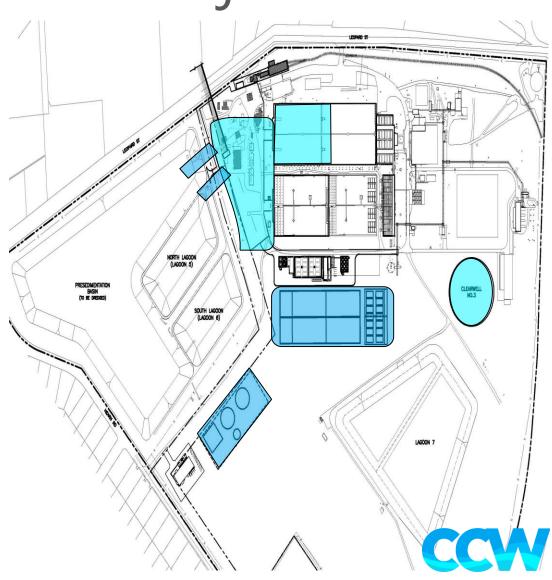

O.N. Stevens Water Treatment Plant

 Several upgrades are underway to produce a safe and reliable treatment capacity (RTC) of 135 MGD

Planned projects are in design to meet RTC of 160 MGD

Upgrades

Planned projects

Diversified Water Portfolio Planning

Harbor Island Seawater Desalination Collaboration with Port Corpus Christi

Include Pape Dawson Inc., for water integration

Evangeline Groundwater

Continued meetings with HDR Inc., on hydrogeologic issues and water delivery

Barney Davis Seawater Desalination

• Review draft report from HDR Inc., desktop assessment

La Quinta Seawater Desalination

Currently under review by TCEQ

Inner Harbor Seawater Desalination

• Intake permit (water right) granted in October 2022 by TCEQ

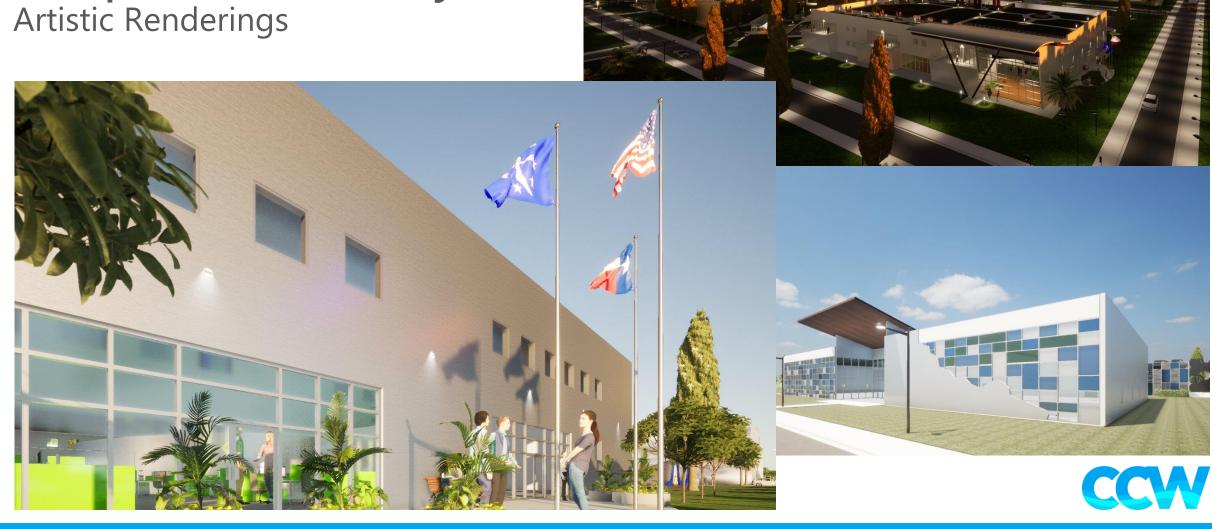

Inner Harbor Proposed Facility Artistic Renderings

Inner Harbor Proposed Facility Artistic Renderings

Thank you!
